

QUALITY POLICY

The pursuit of excellence in the development of our business remains a priority action. As such, we are committed to meeting and exceeding our customers' requirements by fully understanding their expectations and meeting agreed upon requirements for cost, time, quality, and health and safety, while maintaining our customers' expectations and complying with the required legal and regulatory requirements.

This is only possible through the establishment, maintenance and development of a quality management system that applies to all our employees and encompasses all our activities.

In order to respect this commitment, Centrem management provides the material, human and financial resources necessary for the smooth running of its activities in an environment adapted to the development of the skills of each.
